

# FUNNY PAPERS

## User guide

### PHP BACKEND INSTALL

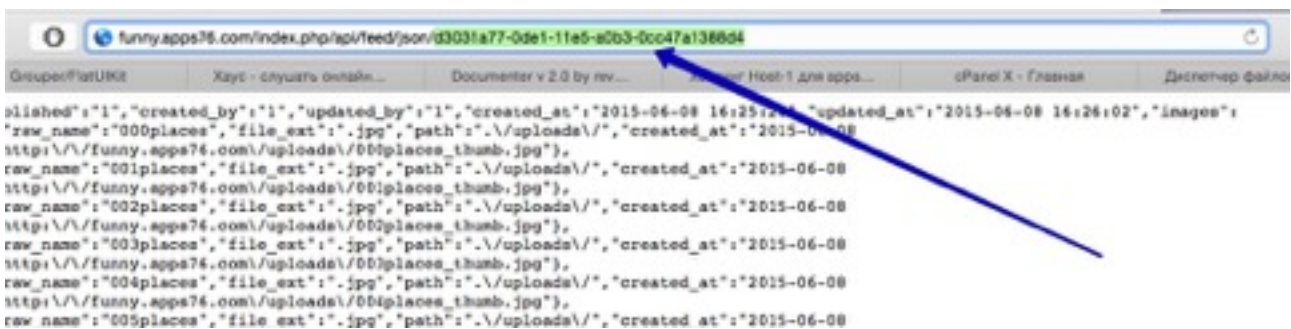

- 1) Unzip and upload all php files in the root folder you hosting
- 2) Open file database.php and write database name, database password, host and database user

```
48 $active_group = 'default';
49 $active_record = TRUE;
50
51 $db['default']['hostname'] = 'localhost';
52 $db['default']['username'] = 'u076305_funny2';
53 $db['default']['password'] = 'password';
54 $db['default']['database'] = 'u076305_funny2';
55 $db['default']['dbdriver'] = 'mysql';
56 $db['default']['dbprefix'] = '';
57 $db['default']['pconnect'] = TRUE;
58 $db['default']['db_debug'] = TRUE;
59 $db['default']['cache_on'] = FALSE;
60 $db['default']['cachedir'] = '';
61 $db['default']['char_set'] = 'utf8';
62 $db['default']['dbcollat'] = 'utf8_general_ci';
63 $db['default']['swap_pre'] = '';
64 $db['default']['autoinit'] = TRUE;
65 $db['default']['strict'] = FALSE;
66
67
```

- 3) open backend url and run install
- 4) make new wallpaper album and upload wallpaper
- 5) open Xcode project, find config.h file and change backend url:

**line 10** `#define PointParseUrl` @ «[http://you\\_backend\\_url/](http://you_backend_url/)»

- 6) go to backend and open any album
- 7) find «JSON Feed» button and click it
- 8) Copy and paste album id in Xcode project, config.h file

funny.apps76.com/index.php/api/feed/json/03031a77-0de1-11e5-a0b3-0cc47a1388d4
